TECHNICAL SKILLS

Development and APIs

C# .NET JavaScript
TypeScript Python Java
React.js Node.js NestJS
FastAPI Spring Boot
REST APIs WebSocket
Postman

Power Platform and Azure

Power Apps (code apps)
Microsoft Dataverse
Power Platform CLI/SDK
Power Automate (in progress)
Microsoft Azure Azure CLI
Key Vault PowerShell

Data and tools

PostgreSQL Cassandra
SQL/CQL Docker Jenkins
CI/CD

Support, QA and tools

- Application and API debugging
- Bug reproduction
- Functional and automated testing
- Technical documentation

Git/GitHub Microsoft 365
Linux

French · Native

English · Intermediate
(continuing to improve)

01 PROFESSIONAL PROFILE

Computer Engineering Technology graduate with High Honours (GPA 4.007/5). I develop and support digital solutions using React, TypeScript, C#, .NET, Power Apps, REST APIs, and Microsoft Azure. Practical experience in applied research, API integration, debugging, testing, and technical documentation. Attentive, independent, and thorough, I explain solutions clearly, work well with teams, and support users with patience and a strong service mindset.

02 PROFESSIONAL EXPERIENCE

Full Stack Web Developer – Applied Research

Feb 2026 – May 2026

GénieLab – InnovaCité, Collège La Cité · Ottawa, ON

- Developed GENIXI, a web application for navigation and geospatial visualization, using React, TypeScript, Vite, Tailwind CSS and Leaflet in a multidisciplinary Agile team.
- Designed reusable interactive components and integrated FastAPI and Deepgram REST APIs and custom React hooks.
- Diagnosed and resolved API integration issues and cross-platform bugs, including on iOS.
- Performed functional and technical tests to validate fixes and feature stability.
- Configured a secure deployment environment with HTTPS and Cloudflare Tunnel; wrote documentation and transferred knowledge.

Receptionist – Bilingual Customer Service

Sep 2024 – Sep 2026

La Cité Residence · Ottawa, ON

- Welcomed and assisted residents and visitors in French and English as the residence's first point of contact.
- Assessed requests, resolved routine problems and referred issues requiring specialized assistance.
- Handled multiple requests at once and prioritized urgent situations with composure, discretion and professionalism.
- Communicated follow-ups clearly to clients, colleagues and managers to ensure continuity of service.
- Used Microsoft 365 daily and worked independently in a dynamic service environment.

03 EDUCATION

Ontario College Advanced Diploma

High Honours — GPA 4.007/5

Computer Engineering Technology · Collège La Cité, Ottawa, ON

June 2026

Coursework in web and mobile development, object-oriented programming, software architecture, APIs, databases, cloud computing, cybersecurity, networking, software testing and Agile methods.

04 SELECTED TECHNICAL PROJECTS

ATIP Tracker – Power Apps code app Personal project, fictional scenario 2026

Power Apps React TypeScript Vite Microsoft Dataverse Power Platform CLI

- Developed a French/English interface to track access-to-information requests, including case creation, deadlines, activity logs and extension requests.
- Modelled Dataverse tables and deployed the code app on Power Platform; documented the architecture and migration from a canvas app.

SecureGate – Secure authentication application Technical project Aug 2026

Java 21 Spring Boot PostgreSQL React Docker GitHub Actions

- Developed MFA/TOTP authentication, role-based access control (RBAC) and revocable JWT handling.
- Integrated an audit log and documented application security tests.

WCAG Accessibility Auditor Technical project Jul 2026

NestJS TypeScript Prisma PostgreSQL Playwright axe-core React

- Built real accessibility scans with issue categorization and scan history.
- Implemented PDF and CSV exports and protection against server-side request forgery (SSRF).

GENIXI – Navigation web application Applied research project Feb 2026 – May 2026

React TypeScript Vite Tailwind CSS Leaflet Web Speech API FastAPI Deepgram

- Developed a component-based interface with geospatial visualization, REST APIs and voice features.
- Debugged, tested across platforms and documented the application.

SmartCart – Android mobile application Team capstone project Dec 2025 – Apr 2026

Kotlin Jetpack Compose NestJS WebSocket Railway Cloudinary

- Integrated 22 API endpoints to connect the mobile application to a cloud backend and manage data exchange.
- Implemented real-time data and text-to-speech features in a collaborative team setting.

Distributed reservation system Academic project Mar 2026

Cassandra CQL Docker Query-First modelling Chebotko method

- Deployed a three-node Cassandra cluster in Docker with a replication factor of RF=3.
- Designed 12 CQL tables around query requirements to optimize data access.

Microsoft Azure infrastructure Academic project Jan 2026 – Apr 2026

Azure CLI PowerShell VNets VMs Storage Key Vault VNet Peering

- Deployed and configured cloud infrastructure including virtual networks, virtual machines and storage services.
- Automated configuration tasks with PowerShell and applied network and security settings.

INTERPERSONAL SKILLS

- Teamwork Active listening
- Clear communication
- Attention to detail Independence
- Adaptability Courtesy and discretion
